ACTIVITY REPORT - PORTUGAL
2011

29 January – General Assembly of the Medical Physics Division of the Portuguese Physics Society (DFM_SPF) where the 2010 Activity Report was presented and the Annual Plan for 2011 was approved. The main project for 2011 is to develop at the national level the IAEA dosimetry audit on TPS for external radiotherapy.

31 January to 14 February – DFM_SPF was asked to give opinion on two projects of legal documents about Medical Physics Expert and Qualified Medical Physicist. A report was produced including the EFOMP recommendations.

February – Presentation of the IAEA Project on "TPS Audit" to the National Coordinator for the Oncology Diseases in order to obtain his support for the development of the Project in Portugal.

March – Publication of the nº 3 of the DFM_SPF Newsletter (http://dfm.spf.pt)

April-July – Preparation of the Workshop IAEA – TPS quality audit to be held on September 24, in Coimbra (http://eventos.spf.pt/workshop11)

9-10 May – Participation in the MPE Guidelines Workshop, Seville (Spain) with the electronic poster presentation entitled "The Medical Physics Status in Portugal" (see document: MP_Portugal VF.pdf)

21 June – Sending to the MPE Project coordinator and to the President of EFOMP of the Portuguese contribution to the discussion on the definition and qualification framework for MPE. (see document: MPE_Portugal.pdf)

Coimbra, August 2011
